[1] Population counts for congressional districts are based on 1970 census complete-count data; housing unit counts are based on 1970 census sample data. These counts may not add to State totals because of post-1970 census corrections which were not assigned by congressional district and also because of sampling variability for housing unit counts.

[1] The dropouts on this page represent the number of dropouts in a given year as a percent of the enrollment. Many of these children return to school the next year and possibly dropped out again the next year. Tables 4.8 and 4.9 should be studied to get the true picture of the number of pupils who start school in grade one and stay in school to graduate. Table 4.9 shows the number of fifth graders who remained in school and entered the twelfth grade seven years later.

[1] Data covers 166,400 full and part-time production workers in manufacturing, 5,200 non-suprvisory employees in electric services, and 11,900 in banking who worked during or received pay for the payroll period including the 12th of the month. The average earnings are "Gross", that is, they reflect not only changes in basic hourly and incentive wage rates, but also such factors as premium pay for overtime work and shift differentials. The workweek information relates to average hours worked or paid for and is somewhat different from scheduled hours because of such factors as absenteeism, labor turnover, part-time work, overtime work and stoppages. These series are prepared by the Mississippi Employment Security Commission in cooperation with the Bureau of Labor Statistics of the United States Department of Labor.

[2] Where data for an individual establishment or reporting unit would not be divulged, monthly employment and quarterly wages are given for industry divisions and for two-digit and three-digit groups. Criteria for non-disclosure of individual employer data are as follows: In cases where there are fewer than three establishments or reporting units and one of these contains 80 percent or more of the employment of the division or group, employment and wages data are combined and shown with data for other divisions or groups. Such data are included in county totals.

[3] The data for these industries are included in the NDC classification code that immediately follows the code numbers in the table with the corresponding first two digits.

[1] Vehicles of the civilian branches of the Federal Government are given in this table. Vehicles of the military services are not included.

[2] This information, compiled chiefly from reports of State Authorities is incomplete in many cases. Some States give State-owned vehicles only; others exclude from registration certain classes, such as fire apparatus, and police vehicles. For the States not reporting State, County, and Municipal vehicles separately from private and commercial vehicles and those reporting unsegregated totals only, classification by vehicle type has been approximated on the basis of other available data.

The number of courts reporting to the Department of Public Welfare affects the total children's cases and consequently the comparability from year to year of youth court statistics. Courts from only four counties (Bolivar, Hinds, Pike, and Warren) have reported one or more cases for each year from 1950 through 1972. The size of the courts not reporting also influences the total cases.

Because of many limitations the trend table does not show the extent of delinquency or neglect in this state and may be particularly misleading if only total number of cases is used to make comparisons between years.

[1] Commercial timberland is forest land which is producing or is capable of producing crops of industrial wood and not withdrawn from timber utilization by statute or administrative regulation. Areas qualifying as commercial timberland have the capability of producing in excess of 20 cubic feet per acre per year of industrial wood in natural stands. Currently inaccessible and inoperable areas are included.

[2] Includes Indian lands.

[3] Net volume of the saw log portion of live sawtimber trees in board feet, International ¼-inch log rule.

[4] Net volume in cubic feet of live sawtimber and poletimber trees from stump to a minimum 4-inch top (of central stem) outside bark or to the point where the central stem breaks into limbs.
